

The Raceplace's Scalextric and Ninco Track Plan Book 4 by:

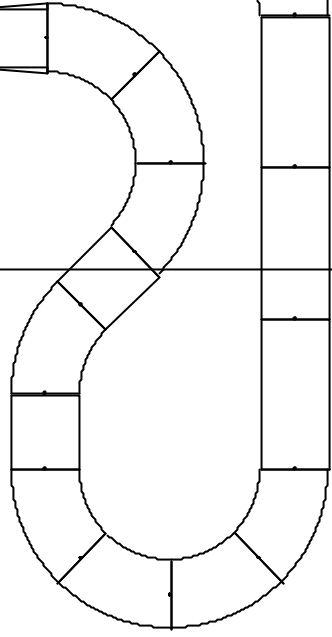

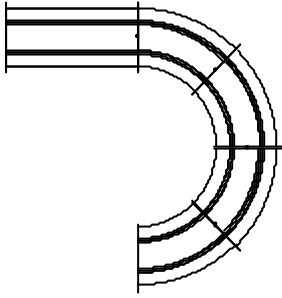

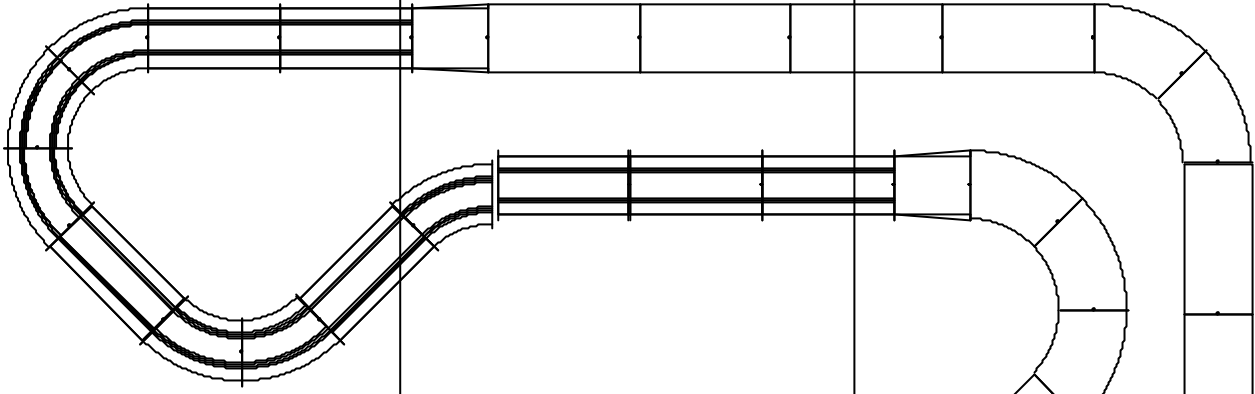

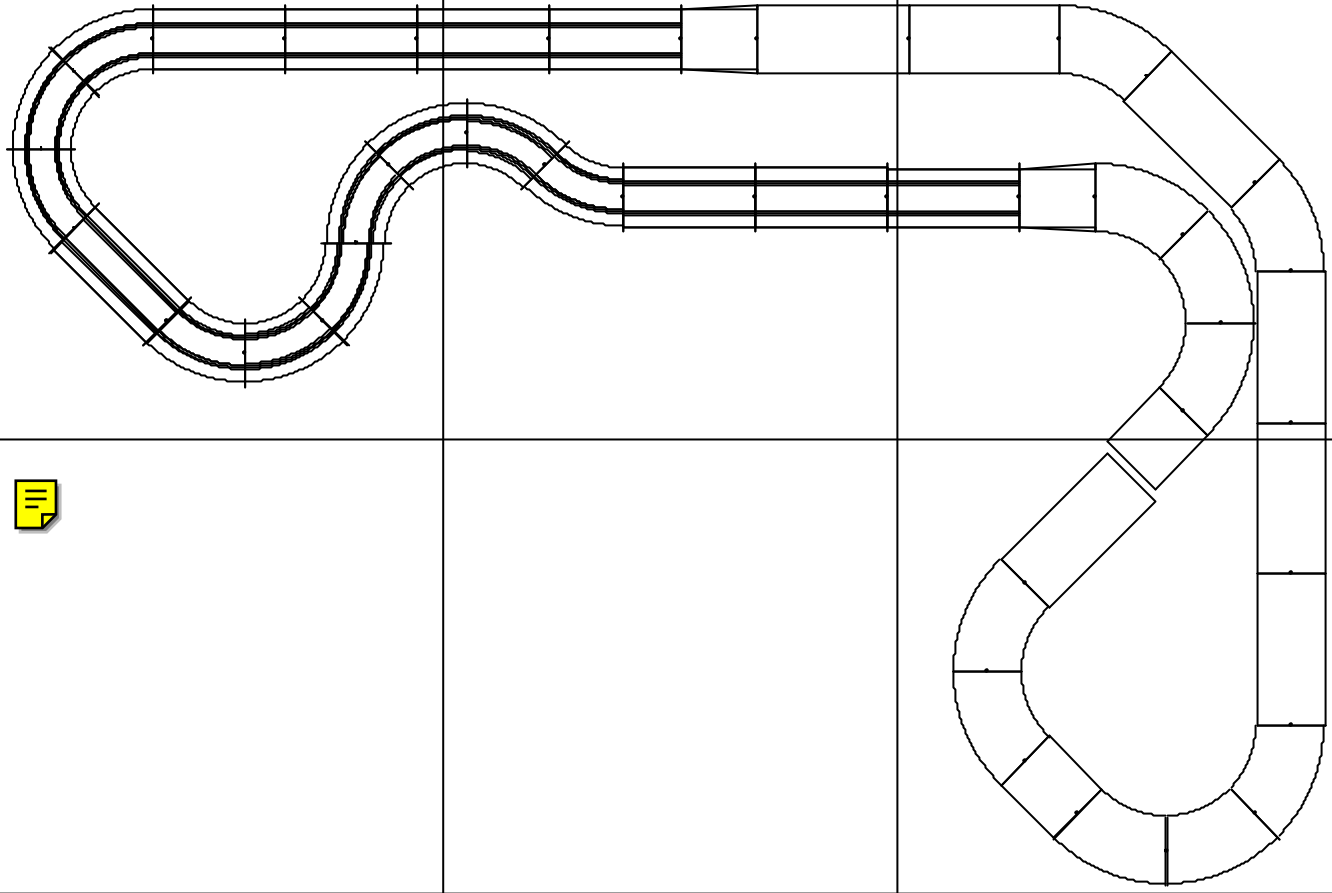

In this book, you'll find different 2 lanes Scalextric and Ninco Track Plans I have drawn. I haven't tested all of them myself yet. If you do put one together and race on it, please give me an email with some feedback about how you liked it. The grid is 1 meter.

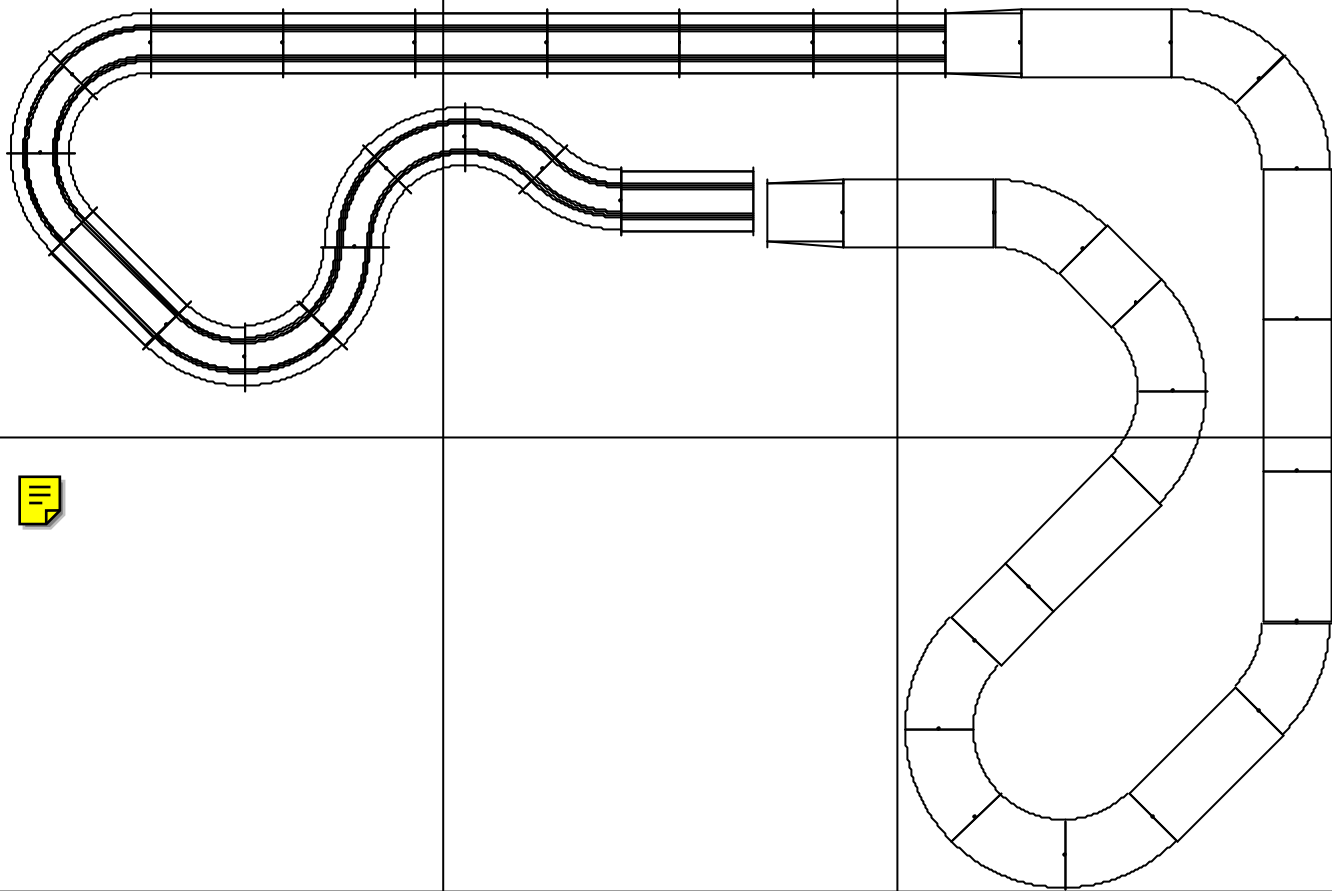

The needed track is listed in german, but you can use the numbers to get the right track pieces if you don't understand the text.

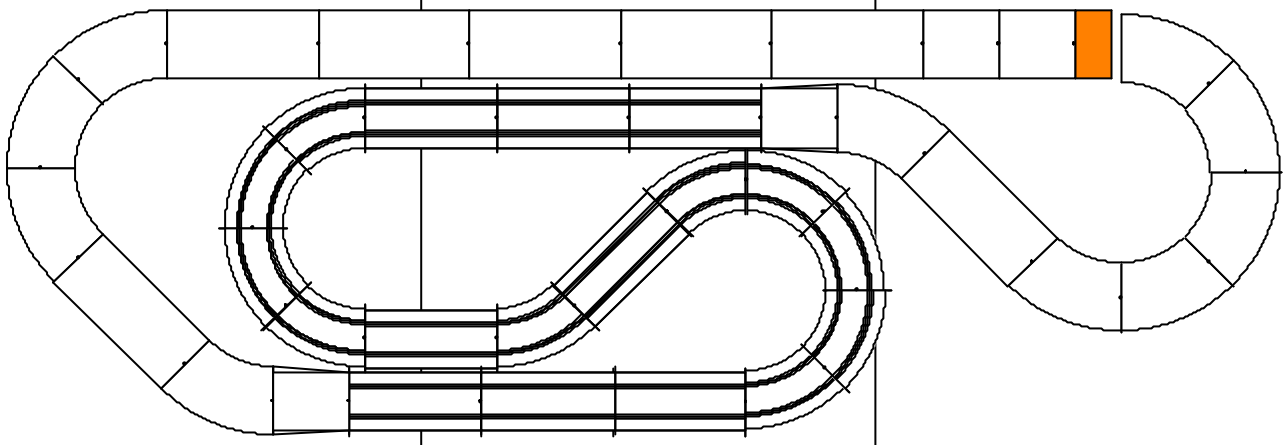

Hope you'll have fun with them!
